Amendments to the Specification

Please amend the specification under the provisions of 37 C.F.R. \$1.121 (revised amendment format) as indicated below, with added matter indicated by underlining.

On page 10, please amend the first paragraph between lines 17-24 as follows:

B

(A) p27 (+/+), p27 (+/-) and p27 (-/-) mice were injected with rapamycin (4 mg/kg/day) for 5 days. The aortas were explanted, and migration of SMC was quantified and is presented as the rapamycin-mediated inhibition of migration as a % of control. Rapamycin significantly inhibited migration in both p27 (+/+) and p27 (+/-) SMC; rapamycin had no effect on p27 (-/-) SMC explant migration.
